How it works-

Borrowers can take advantage of a reduced rate for the first ONE or TWO years.

It allows buyer to enjoy a temporary rate reduction on their interest rate while getting into the home they want now. Also giving them a lower monthly payment for the first year or two will allow them to put money away in savings or other household obligations.

The seller pays for they buydown. The payment is in the form of mortgage points or a lump sum in an escrow account and then used to subsidize the borrowers reduced monthly payment.
